Internet and Copyright Law in the European perspective The Digital Single Market Copyright

(in Italian and English with simultaneous translation)

Cod. Corso: D15377

Date: 4-5 November 2015

Place: Court of Milan - Aula Magna "Emilio Alessandrini e Guido Galli"

Organization: Francesca Fiecconi, Italian Judges' Permanent Training Program – District of Milan

Presentation

The introduction of communications via Internet and the wide use of digital contents have dramatically demonstrated that most of the national copyright laws need to be re-evaluated and that the borders between communication, distribution and reproduction rights should be reviewed taking into consideration needs and structure of digital economy. It is worth remembering that the European Commission has recently published its *Digital Single Market Strategy for Europe* and that the reform of copyright law plays an important role in achieving the goals indicated by President Jean-Claude Juncker.

UE legislative proposals for a reform of the copyright regime are expected at the end of 2015 and early 2016. This makes the Congress a strategic occasion for information and discussion, a thinking arena, with the purpose of comparing national approaches on copyright issues, looking to a European view.

Wednesday 4th November 2015
